EDUCATION

SRM Institute of Science And Technology — Modinagar, India Bachelors in Technology — Computer Science	2024 – Present
Dayawati Modi Academy — Meerut Senior Secondary Education — PCM	April 2024
Dayawati Modi Academy — Meerut Secondary Education	May 2022

EXPERIENCE

Software Developer Intern — HustleGrad, Meerut - Working on real-world backend features, debugging, and automation tasks as part of a product team. - Collaborating with team members on feature development and contributing ideas during brainstorming sessions.	Jan 2026 – Present
Technical Member — Geekroom, Modinagar - Contributing to technical workshops, hackathons, and community-driven development projects.	Jan 2026 – Present
Technical Member — CSI, Modinagar - Supporting technical initiatives, peer knowledge-sharing, and coding events within the student chapter.	Nov 2025 – Present

SOFTWARE PROJECTS

J.A.R.V.I.S — AI Desktop Assistant (Ongoing)

github.com/RydertHuGlife/J.A.R.V.I.S

- Built an AI-powered desktop assistant with a custom Tkinter HUD, voice recognition, and Piper neural TTS with per-sentence audio caching for low-latency responses.
- Integrated Groq Cloud API (LLaMA 3.3-70b) as the AI brain with agentic tool-calling: terminal command execution, real-time web search via DuckDuckGo, and directory scanning.
- Implemented wake-word detection, Wayland/X11 cross-compatibility, clipboard automation, and concurrent dual-endpoint search with TTL-based LRU caching (200-entry).
- **Utilized:** Python, Groq Cloud API, LLaMA 3.3-70b, Piper TTS, SpeechRecognition, Tkinter, PyAutoGUI, BeautifulSoup, Threading

IITD RL Minesweeper

github.com/RydertHuGlife/IITD_Feb26_RL_MINESWEEPER | IIT Delhi Hackathon, Feb 2026

- Trained a reinforcement learning agent using SFT and GRPO to autonomously solve Minesweeper on a 50x50 grid.
- Designed reward shaping and data pipelines enabling the agent to learn logical deduction strategies through self-play.
- **Utilized:** Python, Reinforcement Learning, SFT, GRPO, Scikit-learn, NumPy

Jam_bo — Collaborative Music Streaming Service

github.com/RydertHuGlife/Jam_bo

- Built a real-time music streaming backend enabling synchronized listening sessions for multiple concurrent users.
- Designed backend logic for session management, playback state synchronization, and user coordination.
- **Utilized:** Python, Backend Development, Real-Time Data Handling, REST APIs

Kitaab Gyaani — ADHD-Focused Study Assistant

github.com/RydertHuGlife/KitaabGyaani

- Designed a study assistant for students with ADHD featuring automated focus-session management and distraction-reduction workflows.
- Built structured study-flow automation to help students maintain attention and track progress effectively.
- **Utilized:** Python, Automation, UX Design for Accessibility

SKILLS

Languages (proficient): Python, C++, HTML **Frameworks:** Flask, FastAPI **Databases:** MongoDB, SQLite **Tools:** Git, GitHub, Linux **Concepts:** Machine Learning, OOP, REST APIs, Automation, Data Structures, System Design
